

Senior Backend .Net Software Developer

Overview

Croptimistic Technology builds software for precision agriculture. In this role, the candidate will work on our backend web services, databases, and cloud services to add new features as we scale. They will also develop client-side SDKs which connect to the server services. We are looking for someone who is very strong in .Net and .Net Core and can assist in architecting new services and upgrading existing services to improved patterns and new technologies.

Qualifications

Required:

- 8+ years .Net Development
- 2+ years ASP.net Core
- Advanced knowledge of C# patterns and best practices.
- PostgreSQL
- Source Control – GIT
- API Development
- Experience with Cloud Services (AWS)
- Experience with complex, enterprise-level software development.
- Strong Refactoring and Debugging skills

Preferred:

- Degree in software development or similar training.
- Background in Agriculture, not necessary but an asset.

Location

Kelowna, BC (Temporarily Remote)
