

## ***Mobile App Developer – C# Xamarin***

### **Overview**

Croptimistic Technology builds software for precision agriculture. In this role you will develop mobile applications for agriculture using Xamarin Forms. You will build complex layouts and controls that are user friendly with modern and professional design. You will work with other developers to bring new features to production and maintain/upgrade existing applications. You will build advanced Ag-Tech applications that support viewing and editing GIS data, 2D & 3D Maps, graphs, charts, and image processing.

### **Qualifications**

Required:

- C# .Net
- Xamarin Forms
- MVVM
- Ability to build beautiful, useable, user interfaces
- Experience with complex, enterprise-level software development

Preferred:

- Degree or certification in Software Development
- 3+ years software development in .NET
- Background in Agriculture, not necessary but an asset

### **Location**

Kelowna, BC (Temporarily Remote)

### **Applications**
