

Front-End Developer - .Net WPF, UWP, Uno Platform

Overview

Croptimistic Technology builds software for precision agriculture. We are hiring a front-end developer to work on desktop (WPF) and Web (Uno Platform). Applicants should be very good with MVVM and Xaml. Focus will be on building modern, professional looking user interfaces. We would like this person to fill the role of Front-End Xaml expert who will build reusable control and set styles and standards.

Qualifications

Required:

- 5+ years of software development experience
- 2+ years experience Front-End development with MVVM, Xaml
- WPF, UWP, or Uno Platform
- Experience with complex, enterprise-level software development.
- GIT
- Visual Studio
- Ability to assist others with front-end patterns and styles.

Preferred:

- Degree or diploma in software development
- Ability to do image editing / toolbar icon design.
- Background in Agriculture, not necessary but an asset.

Location

Kelowna, BC (Temporarily Remote)
